## Q-con delivers **Wireless Seismic Real-Time Monitoring System** to Australian Gas Company **SANTOS Ltd**

Q-con has designed and delivered a turn-key seismic monitoring system for Santos Ltd, Australia. The network has been recently installed and put into operation in the desert of the Australian Outback.

The **solar powered, self-sustained** system is equipped with Q-con's **Real-Time Monitoring Software** and with **wireless data transfer** components to provide highest data quality for the monitoring of Santos' reservoir operations.

We wish to thank all persons and companies involved in the project for the great collaboration, esp Geotech Instruments LLC, Avalon Sciences Ltd. and the personnel from Santos.
